Summary:

Flexible, motivated and creative 2D artist with more than 10 years of experience in traditional and digital art. Advanced knowledge of Adobe applications. Adept at managing heavy workloads. Versatile and resourceful. Thrives in a highly collaborative, fast-paced environment.

Skills:

- Creative character and environment designs: I am a versatile artist capable of a broad range of styles in both traditional and digital media.
- Master of anatomy: I've been studying and perfecting the human form for a decade, and I also excel at creating creatures thanks to a deep understanding of organic movement.
- Expert in Adobe Photoshop: I've been working in Photoshop since elementary school, and am extremely comfortable navigating and using its features.
- Other software: General to intermediate understanding of Maya, Unreal Engine, Unity and Game Maker Studios.
- Story boarding: Intermediate knowledge of storyboarding, including strong understanding of camera angles and movement.
- Level design: Intermediate knowledge of level design, including creating paper maps, white boxes and final builds.
- General scripting knowledge: Experience in Java, C++, GML and Blueprints visual scripting.
- Basic project management knowledge.
- Superb attention to detail, organizational skills and time management.
- Excellent team player with strong collaboration and leadership skills.
- Very fast learner with a strong aptitude for software and technology.

Experience:

- Utilized a detail-oriented approach and high standard of accuracy on commissioned art.
- Worked closely with clients to ensure satisfaction and on-time delivery.
- Assessed and tested game builds to uncover bugs and assisted in finding resolutions.
- Developed popular character mods on the Steam workshop.

Education and Training:

Bachelor of Arts. Arts, Technology, and Emerging Communications with Gaming.

University of Texas at Dallas – Richardson, TX
